

REFERENCES

VR Group, a.s. has significantly contributed to establishing the Centre of Simulation and Training Technologies in Brno and Vyskov according to training requirements of the Czech Army; the company took care of the system integration, development, facility setup and long-haul communication design. VR Group, a.s. also produced, delivered and supported BMP-2 Full Mission Simulators, Reconfigurable Virtual Simulators and Team Leader Simulators for tactical collective training, simulated command & control systems and integrated the constructive simulation system.

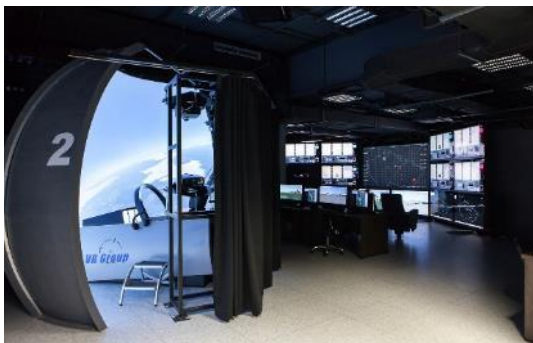

Flight Training Centre in Pardubice – CLV (CZ)

The LOM PRAHA s.p. Flight Training Centre located in Pardubice has been providing complete training of pilots for the Czech Army since 2004. The pilots are trained in modern environment. All ground-based training simulation systems (L-39 CPT, Mi-2 CPT and Mi-171 S) have been delivered by VR Group, a.s.

Tactics Simulation Centre in Pardubice – TSC (CZ)

VR Group, a.s. completely developed and manufactured simulation system for the Tactical Simulation Centre (TSC) established in 2010 in the Flight Training Centre (CLV) in Pardubice. The TSC enables training of up to 8 pilots, 2 GCI, 2 FAC and other participants in the roles of operators, observers and training instructors.

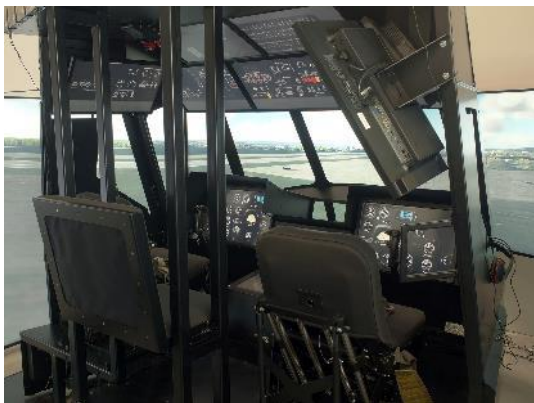

Czech Army Tactical Air Force Base Caslav (CZ)

The Tactical Air Force Base is one of the main combat units of the Czech Army Air Force. Its main duty is to ensure defence and sovereignty of the Czech Republic airspace. VR Group, a.s. has delivered comprehensive simulation system for the ground-based training of L-159 pilots consisting of the Learning Management System, Full mission simulator and Unit Training Device.

Helicopter Training Point - Ostrava (CZ)

HTP Ostrava is focused on flight and tactical simulation training of Mi-8/17/171 helicopters. VR Group, a.s. delivered the comprehensive helicopter tactics training simulation system. The system consists of two crew trainers and enables to train the whole crew (pilots and rear crews) in one common simulation environment.

Armed Forces Academy of General Milan Rastislav Stefanik (SK)

The Armed Forces Academy of General Milan Rastislav Stefanik is a public university established in Liptovsky Mikulas in the Slovak Republic. It has been providing military education for over 60 years. VR Group, a.s. supplied this university with a simulation system for tactical training for individuals and units focused on crisis management via the LYNX Ltd. company based in Kosice. The solution enables training of the security forces, including staff officers in the area of crisis command and control.

Ground based training system for L-39 (Africa)

VR Group, a.s. delivered the comprehensive ground-based training system for L-39 pilots consisting of the Learning Management System (LMS), the Cockpit Procedure Trainer (CPT) and the Full Mission Simulator (FMS).

Air Force Tactical Training System (Asia)

VR Group, a.s. provided comprehensive tactical training system for fighter pilots, consisting of reconfigurable pilot stations, GCI and FAC workplaces and IOS/AAR system for the mission training preparation, control and evaluation.
